This collection of information is required by 37 CFR 1.8. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

For: OSCILLATING FAN CLUTCH

INFORMATION DISCLOSURE STATEMENT

Mail Stop Patent Application
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

In compliance with the duty of disclosure under 37 C.F.R. Section 1.56, it is respectfully requested that this Information Disclosure Statement be entered and the references listed on attached Form PTO/SB/08A be considered by the Examiner and made of record. Copies of the listed references are enclosed for the convenience of the Examiner.

The Applicant hereby advises the United States Patent and Trademark Office of prior patents known to him at the time of filing which came to his attention during a novelty search:

Dilg, 1,337,644 discloses an oscillating fan clutch using projections 12 cooperating with serrations 13 to regulate the degree of eccentricity. The structure required by this arrangement is relatively complex and expensive, and the novel aspects of the invention are not disclosed.

Schneider, 2,838,956 discloses a variable throw crank having a detent 29 engageable with recesses 26. While the degree of eccentricity can be adjusted, the plate elements utilized with the invention are not disclosed, and this type of arrangement would not permit the "self-centering" achievable with the invention.

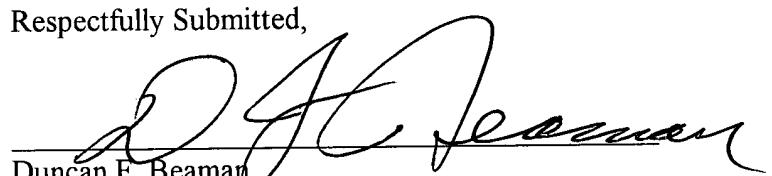

Smith, 2,900,127 discloses an oscillating clutch arrangement which uses principles completely different than those employed in the instant invention.

Braskamp, 3,147,639 utilizes a spring-biased ball 15 for engagement with selected recesses 6. This patent utilizes the spring 14 to permit indexing of the eccentric components, and the movable plates held together by a central shaft having a spring biasing the plates is not suggested.

Song, et al, 6,468,036 discloses an adjustable swinging crank, but the ball 78 and recesses 72 are arranged on the periphery of the rotating component, and the structural features and advantages of economical manufacturer are not present.

In accordance with 37 C.F.R. Section 1.97(g) and (h), this Information Disclosure Statement is not to be construed as a representation that a search has been made, as an admission that the information cited herein is, or is considered to be, material to patentability, or that no other possible material information as defined in 37 C.F.R Section 1.56 exists.

Respectfully Submitted,

Duncan F. Beaman
Reg. No. 18,235

DATED: September 9, 2003
Docket Code: AIR-103-A
Facsimile No. (734) 662-1014

PTO/SB/08a (05-03)

Approved for use through 05/31/2003, OMB 0651-0031

U.S. Patent and Trademark Office; U.S. DEPARTMENT OF COMMERCE

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it contains a valid OMB control number.
